# HDEFI

**Sergey Ivliev** 

**PSS 2019** 

**Decentralized Finance (#DeFi)** is the movement that leverages open source software and decentralized networks to transform traditional financial products into **trustless and transparent protocols** that operate without unnecessary intermediaries.

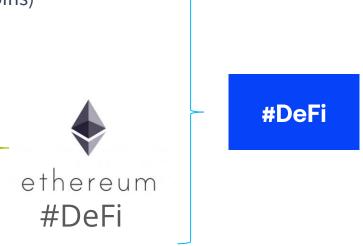

Among its core principles are transparency, accessibility and **financial inclusion**.

Decentralized Finance participants are able to **reduce counterparty risk** via cryptographic verification on public blockchains.

### #DeFi

- Payments (cryptocurrencies, stablecoins)
- Funding (ICO, IEO, STO)
- Borrowing
- Lending
- Decentralized exchanges (DEX)
- Prediction markets
- Asset management / Investments
- Insurance

#### Buy and Hold Sets Learn this Strategy >

Buy And Hold Sets are for you if you are bullish crypto, but want to diversify your risk over multiple tokens. The Buy and Hold strategy automatically rebalances the underlying crypto to maintain a fixed ratio over time. Protect yourself from over exposure to a single token if you believe in the long term outlook of crypto.

# Aggregators

Zerion

- Access to various protocols
- DeFi Portfolio management

Others: InstaDapp, Settle

# Summary

- Bitcoin wholesale payment and SoV (aka digital gold) is a strong use case
- Ethereum DeFi is vibrant, but still a proof of concept
- Advantages:
  - Inclusive (zero KYC, no censorship)
  - Non-custodial (no counterparty credit risk)
  - Transparent and price efficient
  - Global, low cost, fast finality
- Disadvantages:
  - Overcollateralized (doesn't help unbanked to get loans)
  - Technical barrier (e.g. Metamask, keys, ...)
  - Bridge problem
  - Still in beta
